

SCS Installation Instruction

Note: This applies to the Geode and ES-3000 only, which require installation of the software on a PC [typically] supplied by the user. If you have a SmartSeis ST or a StrataVisor NZ, the unit comes with the software pre-installed and pre-registered.

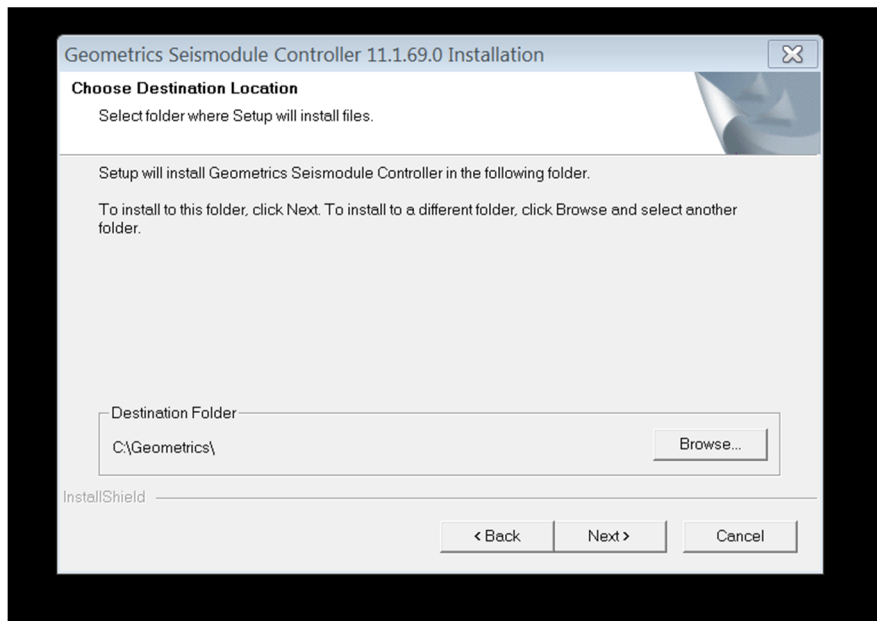

1. Insert the Seismodule Controller Software CD/USB. Alternatively you can download the installation file from our website: <http://www.geometrics.com/geometrics-products/seismographs/download-seismograph-software/> It is located under **Seismodule Controller Software (SCS)**
2. Double click on the setup file to run the installation.

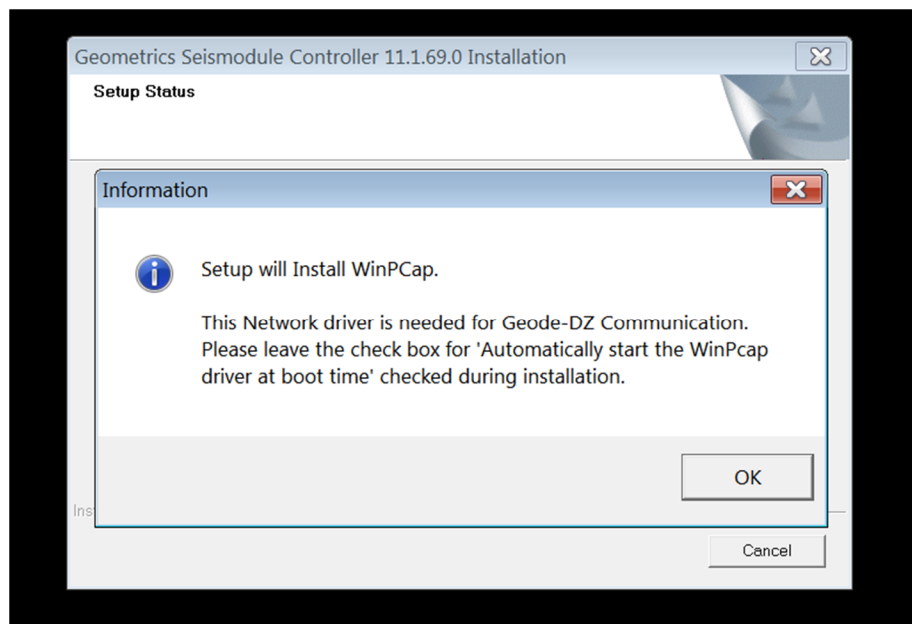

3. Windows will ask for permission to setup the program. Click yes, and the installation wizard will start installing the program. You will need to accept terms and conditions in order to continue.

4. You will be presented with an opportunity to choose the destination folder where you want the SCS to be installed.

5. The program will start installing. If this is your first time installing the SCS then a pop up box will appear asking you to install WinCap. This a program that is required for SCS to communicate with the Geode so go ahead and install WinCap.

6. SCS will finish installing and a shortcut will be automatically created on your desktop.

7. Double click on the icon to run the program. The following registration screen will be displayed upon initial startup of the software:

The screenshot shows a 'Registration' window with a title bar and a close button. The main content area has a light gray background. At the top, there are two small icons of a computer monitor. The text reads: 'Thank you for using Geometrics Seismodule Controller Software.' Below this, it says: 'You need to register this software before you can use it or if you extend your rental or trial period' and 'You can use the software up to 100hrs without registering'. There are two input fields: 'User Code' with the value 'C6C4-0C17-1898' and 'Current Registration Status' with the value 'NOT REGISTERED'. Below these is a section titled 'Select Registration Method' with two options: 'Copy User Information and User Code to a File. Manually Email that File from any PC' and 'OR Please call Geometrics with your User Code at (408) 954-0522'. Below this is a section for entering the registration number, with the text 'Then enter REGISTRATION NUMBER below OR' and a 'Paste From Clipboard' button. There are seven input boxes for the registration number, separated by hyphens. Below these are 'Validate Registration' and 'Cancel' buttons. At the bottom right, there is contact information for Geometrics, Inc.

Registration

Thank you for using Geometrics Seismodule Controller Software.

You need to register this software before you can use it or if you extend your rental or trial period

You can use the software up to 100hrs without registering

User Code

Current Registration Status

Select Registration Method

Copy User Information and User Code to a File. Manually Email that File from any PC

OR

Please call Geometrics with your User Code at (408) 954-0522

Then enter REGISTRATION NUMBER below OR

- - - - - - -

If you have any questions please contact us:

Geometrics, Inc.
2190 Fortune Dr.
San Jose CA 95131 USA.
TEL: (408) 954-0522
FAX: (408) 954-0902
e-mail: seismicsupport@mail.geometrics.com

You have 100 hours of use before you must register your software. To register, you must send us the 12-digit code highlighted at the top of the registration screen.

Note: If you want to register continue to step 9, otherwise to run the demo mode skip to step 10.

8. Pressing “**Copy User Information and User Code to a File. Manually Email that File from any PC**” will bring up the following form:

GEOMETRICS

Innovation • Experience • Results

2190 Fortune Drive, San Jose, CA 95131 USA • www.geometrics.com

Email Registration [X]

Please Enter Contact Information and Click "Send User Information"
Allow one working day to process your request.

City: Zip Code:

State: Country:

Phone Number: Fax Number:

*Email:

*Seismograph Serial Number: Sales Order Number:

Copy User Information and User Code to a File. Manually Email that File from any PC

Cancel

Fill out the form; fields marked with a "*" must be completed. The serial number of any one of your Geode/ES-3000 modules will be sufficient. When you are finished, and if your controller PC is connected to the internet, press **"Copy User Information and User Code to a File. Manually Email that File from any PC"** A "Save As" dialogue box will pop up where you can name your file and specify where you want to save it. After saving the .txt file email it to.

***Note:** If you wish to bypass the form, just email the 12-digit code itself, along with at least one serial number, to the above address. It is not absolutely necessary that you fill out the entire form, but if you do, this information will be stored and included automatically in the event you ever need to send us a troubleshooting diagnostic report.*

9. When you receive your code, copy it to the clipboard, start the software, and when the registration screen appears, press **"Paste From Clipboard,"** and then press **"Validate Registration."**

Registration

Thank you for using Geometrics Seismodule Controller Software.

If you have any questions please contact us:

Geometrics, Inc.
2190 Fortune Dr.
San Jose CA 95131 USA.
TEL: (408) 954-0522
FAX: (408) 954-0902
e-mail: seismicsupport@mail.geometrics.com

Your software should now be registered on this PC and you will not need to register again. Alternatively you can call Geometrics and get help with registration from our support team.

10. You can run the software in the meantime by simply pressing **Cancel** on the registration screen above. You will see the following message, telling you how much time you have left before you must register.

This screen will be presented every time you start the software until you register it. It contains a pull down menu that lists the various software bundles that we offer. Choose the one appropriate for your system, or if you would like to see all of the features (including optional ones), choose “SuperSeis”.

After pressing **OK**, you will see a startup script and be presented with a setup wizard. Please refer to our manual to set up your survey parameters for the first time.
